

Hi TrailMark Community,
We appreciate all the emails we've received and wanted to provide some information regarding TrailMark Park.

South Suburban staff has been aware of kids riding bikes in the open space at TrailMark Park for months. However, in the last two weeks, we were made aware of community-constructed bike jumps in the park that have raised safety concerns with South Suburban, the HOA and some residents.

South Suburban loves the fact that kids are outside, using the parks and being active, but jumps and alterations to trails at the park raise safety concerns for bike riders and casual trail users alike.

South Suburban intends to meet with the neighborhood and HOA in the next few weeks to discuss the park. We will add your email to a distribution list when the meeting location, date and time has been set.

Thank you,
Becky
