

SNAKE SEASON IS HERE!

Summertime brings many snakes down the hogback and into our community. When you live as close to nature as we do, this is not an unusual occurrence, so you must be extremely diligent!

If you have children or grandchildren, keep them away from the bushes...snakes will hide there. If you have a dog, be sure to keep it on a leash! Not all snakes are poisonous. For example, one of the most prevalent snakes in the area is the bull snake. Because of its markings it is often confused with the rattlesnake. However, the bull snake is our friend...it kills rattlesnakes

If you are aware of a snake population, call animal control at 303-754-1551 and they will take care of the issue.
